Backend PHP/Laravel Developer with nearly 2 years of professional experience building scalable web applications using Core PHP, Laravel, MySQL, RESTful APIs, and third-party API integrations. Experienced in designing secure backend architectures, optimizing database performance, and developing maintainable applications following MVC and SOLID principles. Passionate about AI-powered software, Prompt Engineering, and integrating Large Language Model (LLM) APIs into modern SaaS applications.

Technical Skills

Programming Languages: PHP, JavaScript, SQL

Backend Development: Core PHP, Laravel 10+, MVC Architecture, RESTful APIs, Authentication, Authorization, API Development

Artificial Intelligence: Prompt Engineering, AI API Integration, Large Language Models (LLMs), OpenAI API (Learning), Gemini API (Learning), AI Workflows

Databases: MySQL, Database Design, Query Optimization, SQL Performance Tuning

Frontend: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Vue 3, React

API & Integrations: Third-party API Integration, Stripe API, Webhooks, Postman

Tools & DevOps: Git, GitHub, Docker, Linux, Composer

Software Engineering: SOLID Principles, Clean Code, Agile/Scrum, Object-Oriented Programming (OOP), SaaS Development, Problem Solving

Professional Experience

PHP/Laravel Backend Developer *April 2026 – Present*
ZPayso — Lahore, Pakistan

- Develop and maintain enterprise HRM and FinTech applications using Core PHP, Laravel, JavaScript, and MySQL.
- Design and maintain HRM modules including Employee Management, Attendance, Payroll, Leave Management, Roles & Permissions, and Reporting.
- Build secure RESTful APIs, integrate third-party APIs, and optimize MySQL queries for high-volume business operations.

Laravel Developer *Dec 2025 – March 2026*
CodeNax — Pakistan

- Develop scalable backend applications using Laravel, Core PHP, and MySQL.
- Design secure RESTful APIs and integrate third-party services including Stripe payment gateway.
- Optimize SQL queries and collaborate with development teams using Git and Docker.

Junior PHP Developer *Mar 2024 – Oct 2025*
Al-Akhzir Tech — Lahore, Pakistan

- Developed web applications using Core PHP, Laravel, JavaScript, Bootstrap, and MySQL.
- Built reusable backend modules, REST APIs, and integrated third-party APIs.
- Optimized SQL queries, fixed production issues, and collaborated in Agile teams using Git.

Key Projects

Enterprise HRM System *Core PHP, Laravel, MySQL, JavaScript*

- Developed a complete Human Resource Management (HRM) system for enterprise use.
- Implemented Employee Management, Attendance Tracking, Leave Management, Payroll, Departments, Roles & Permissions.
- Automated salary calculations, overtime, deductions, allowances, and payroll reporting.
- Built secure RESTful APIs and optimized MySQL queries for improved system performance.

OUTS Mobile & Web Application *Laravel, MySQL, Next.js*

- Developed backend modules and RESTful APIs for a multi-user SaaS platform.
- Implemented authentication, role-based access control, and optimized database queries.
- Collaborated with frontend developers to deliver scalable API-driven features.

E-Commerce Platform *Laravel, MySQL, Stripe API*

- Built e-commerce features including product management, order processing, and payment integration.
- Integrated Stripe payment gateway with secure webhook handling.
- Designed optimized MySQL database structures for better performance.

Online Examination Management System *Laravel, MySQL*

- Developed a complete examination management system as an academic project.
- Implemented user authentication, student management, exam scheduling, and result generation.
- Built CRUD modules and responsive dashboards using Laravel and Bootstrap.

Custom Business Management Applications *PHP, Laravel, MySQL*

- Developed customized modules including inventory management, customer management, project management, and reporting.
- Designed reusable backend components and optimized application performance.
- Integrated third-party services and maintained secure API communication.

Education

Bachelor of Software Engineering *2018 – 2022*
Virtual University of Pakistan

Core Competencies

- Backend Development • Core PHP • Laravel • RESTful APIs • MySQL
- HRM Systems • FinTech Applications • Third-party API Integration • Stripe API
- Authentication • Authorization • MVC Architecture • SOLID Principles
- Database Design • Query Optimization • Git • Docker • Linux
- Problem Solving • Agile/Scrum • SaaS Development • Object-Oriented Programming (OOP)
- Prompt Engineering • AI Workflows • OpenAI API (Learning) • Gemini API (Learning)
